Building Performance Database | Department of Energy The Building Performance Database (BPD) is the nation's largest dataset of information about the energy-related characteristics of commercial and residential buildings. The BPD combines, cleanses and anonymizes data collected by federal, state and local governments, utilities, energy efficiency programs, building owners and private companies, and makes it available to the public. The website. Top 10 Steps to Building Useful Database Indexes ... With the caveat that appropriate index creation can be complicated, let's look at the top 10 steps to building the right indexes on your tables. Perhaps, the most important thing you can do to assure optimal application performance when accessing data in a relational/SQL database is to create the correct indexes for your tables based on the queries your applications use. Building a Database for Performance - Oracle Building a Database for Performance. Although performance modifications can be made to both the database and to the Oracle instance at a later time, much can be gained by carefully designing the database for the intended needs. This chapter contains the following sections: Initial Database Creation; Creating Tables for Good Performance; Loading and Indexing Data; Initial Instance Configuration.
